

What is a “dock”?

A dock means that a portion of your salary or wages has not been earned based on your work week. If part of a work week is missed and no leave balance is available to use to offset the time missed, a dock for the time short of schedule will be reflected on your paycheck.

Some reasons a dock would occur:

Not working entire scheduled hours during the work week

Not entering an absence in TEAMS

No remaining leave balance available to use
