

Information on Extra Printable Resources

These resources were created to fill in the gaps for some of our grade levels. When we created the elementary packets, we had planned for K-5th to get sight words. When the materials came in, we did not have enough for all grades and they were not appropriate for 4th and 5th grade. I have chosen some more appropriate sight word practice for 4th and 5th grade. Due to the shortage, some kindergarten students also may be missing cards so I have included resources for them as well.

We were also short addition flashcards for some 1st and 2nd graders so I have included those as well.

Included are:

1. Addition flashcards. (1st and 2nd grade)

Directions: Take off the first sheet and run the next 4 pages as a 2 sided copy.

2. A blank flashcard template is included that you could give to families to also create their own math, sight word or vocabulary words.
3. Dolch primer words can be used for

kindergarten because we had to stop putting sight words in most of the bags due to what we thought was a lack of cards. (We do have some still that we will deliver with packets)

4. Dolch primer list and recording sheet that parents could check off as students are able to read.
5. Fry sight word lists: 4th and 5th
6. Fry sight word cards (2 sets). Either set could be run for fourth and fifth grade to give them words to practice.
7. Number flash cards for kindergarten. They ran out for some bags.
8. Multiplication cards that can be run if anyone did not receive their cards.
