This warning will appear. Please read carefully.

Emergency Call Warning

This application is intended only for enterprise calling and as such emergency calls (e.g. 911) will be routed over the cellular radio when available and not over the WiFi radio.

Therefore you must ensure that the phone has cellular signal prior to being able to place an emergency call.

You acknowledge that we have informed you that the application does not support emergency calling.

If you do not accept these terms then the application configuration shall quit and you will not be able to use it for enterprise calling.
