The Academy of Education and Training prepares students for careers related to teaching, instruction, and creation of instructional and enrichment materials. The academy introduces students to a wide variety of student groups and their corresponding needs. It familiarizes them with the processes for developing curriculum, coordinating educational content, and coaching groups and individuals.

The Education and Training Career cluster focuses on planning, managing, and providing education and training services and related learning support services. All courses are designed to introduce learners to the various careers available within the Education and Training career cluster. Careers in this cluster require a strong academic foundation, a proficiency in oral and written communications, knowledge of human behavior, active listening, critical/creative thinking, and the ability to collaborate well with others. Those who excel in this career cluster quickly appraise situations, determine changes needed for improvement, develop solutions, and immediately implement those solutions.

Successful completion of the Education and Training program will fulfill the requirements of the Public Service Endorsement.
