The Academy of Health Science introduces students to occupational and educational opportunities related to diagnosing and treating acute, episodic, or chronic illness independently or as a part of a health care team. The Academy also includes an introduction to the opportunities associated with providing treatment and counseling to patients as well as rehabilitative programs that help build or restore daily living skills to persons with disabilities or developmental delays.

The Health Science Career cluster focuses on planning, managing, and providing therapeutic services, diagnostics services, health informatics, support services, and biotechnology research and development. Those who excel in this career cluster possess strong critical thinking skills, confidently make decisions, thoughtfully solve problems, effectively communicate, collaborate well with others, and possess a solid academic background, especially in science.

Successful completion of the Academy of Health Science will fulfill the requirements of the Public Service Endorsement.
