Discussion Items:

- Campus Improvement Plan Formative Review: the group broke into teams to review the CIP and complete the formative review. While reviewing questions were asked such as “What other PD needs are there? Do the strategies listed mean AVID last summer or next? Should we mark it accomplished already?” We discussed that the funding is for this school year and beyond, so some things are “no progress” because they will not occur until spring. We also discussed that we have had some Co-Teach training presented by Tarleton, and Ms. Lange provided AVID training to the Tarleton students, which is the evidence for the goal about the Tarleton/Cedar Ridge Partnership.
- Parent Involvement: family attendance has grown again this year at our different events. Thanksgiving lunch was very highly attended, with every grade level needing their own seating due to the number of people present.
